TECHNICAL SKILLS

- **Programming:** JavaScript, TypeScript, Java, C, Python, Object-Oriented Programming (OOP)
- **Front-end:** React, Next.js, Redux, Tailwind, Refine, Framer Motion, Bootstrap, jQuery
- **Back-end:** Node.js, Express.js, NestJS, GraphQL, REST APIs, WebSocket
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB, Redis, Prisma ORM
- **Security:** Cryptography, Authentication (Sessions, JWT, OAuth), Web Security
- **Cloud:** Vercel, Netlify, Cloudinary, Cloudflare
- **CI/CD:** Docker, Docker Compose, GitHub Actions, Kubernetes
- **Tools:** Git, GitHub, Postman
- **Design:** UML/MERISE, ER Modeling
- **Project Management:** Agile (Scrum, DSDM), Trello, Notion

SOFT SKILLS

- Problem solving
- Fast and autonomous learning
- Clean code structure and readability
- Teamwork & remote collaboration

LANGUAGES

- English: Professional proficiency
- French: Fluent (TCF C2)
- Kabyle: Native
- Arabic: Fluent

OBJECTIVE

Software Engineer crafting scalable web applications and digital products that transform ideas into meaningful digital experiences. I help businesses and individuals bring their vision to life through high performance websites and custom built applications, combining precision, creativity, and modern technologies to deliver reliable solutions that drive real value.

EDUCATION

2024 - 2026 (In Progress)

MASTER'S DEGREE IN CS

- University of Bejaia, Algeria
- Track: Software Engineering

2021 - 2024

BACHELOR'S DEGREE IN CS

- University of Bejaia, Algeria
- Track: Information Systems

2019 - 2021

PREPARATORY CLASSES

- National Higher School of CS (ESI - Algiers)

2019

BACCALAUREATE IN MATHEMATICS

- Graduated with High Honors

EXPERIENCE

Software Engineer Intern

Futurelec - Akbou, Béjaia (Hybrid)

February 22 - May 21, 2026 · Full-time (3 months)

- End-of-studies internship focused on designing and developing a modular and intelligent inventory management platform. Working on microservices architecture, real-time stock processing, demand forecasting, and implementing modern DevOps practices (Docker, CI/CD) to build a scalable and maintainable system.

Frontend Developer

Futurelec - Akbou, Béjaia (Remote)

August - November, 2025 · Part-time

- Worked on application development and feature implementation as part of an internal software solution.

Software Engineer Intern - Backend

Eastern Al Maha - Kuwait City (Remote)

June 15 - August 15, 2025 · Full-time (2 months)

- Contributed to the development and optimization of a microservices backend architecture supporting multiple products, working closely with frontend and machine learning teams.

Information Systems Engineering Intern

CEVITAL - Béjaia (On-site)

June 30 - August 1, 2024 · Full-time (1 month)

- Participated in improving existing systems through design and development contributions.
